

Summary

20+ years .NET/C# experience across 9 large-scale applications: 5 trading and logistics platforms, 4 commercial products up to \$150M budget and \$200+M revenue. Bringing exceptional technical depth, breadth and scale as a seasoned senior developer/individual contributor, a technical lead of 10+ teams of 3-20 direct reports, multi-disciplinary architect and mentor.

Qualities

- Seasoned, agile developer/architect and mentor, **hands on**
- Understands technical stacks, where they work or don't
- Communicates well with peers, customers, and executives
- Designs, develops, integrates, and delivers impactful solutions
- Troubleshoots operational issues looking for root cause
- Matches tactics that support the strategic goals of the business
- Mitigates risks, making informed, yet timely decisions
- Mentors, builds trust, listens, and learns
- Stays current with industry trends and technologies
- Improves quality, velocity, process, and self continuously
- Works well in a myriad of company sizes and types

Architecture

- Azure, AWS, Kubernetes, Docker, and related infrastructure
- DDD, Distributed, Clean and Vertical Slice architectures
- Messaging, streaming and integration patterns
- Integration with APIs and microservices, cloud to ground

Domains

- Energy, Oil and Gas, Commodities, Finance/Fintech
- Transportation, Education, Aerospace, ISV, Compliance

Languages, Frameworks & Tools

- AI: GitHub Copilot, Claude Code
- C#, .NET, LINQ, JavaScript, ASP.NET, C++, Java
- REST, Web API, entity framework, open source
- IDE/CLI: Visual Studio, ReSharper, bash, dotnet, aws, git
- Operating Environments: Azure, AWS, Docker, Windows
- Integration: messaging, streaming, APIs (many technologies)
- Observability: Datadog, AppInsights, etc.
- Data: MongoDB, Redis, SQL Server, MySQL, Oracle
- ETRM: Endur, RightAngle
- UI: ASP.NET MVC, Razor, WPF, MVC, MVVM

Process

- Agile, Scrum/Kanban, TDD, BDD, Gherkin
- Complete software design lifecycle (SDLC) participation
- Project tracking: Jira, Azure DevOps, GitHub, GitLab
- BizDesign, PowerDesigner. Focus on data.
- Coder, mentor, technical writer, trainer, presenter

At a glance

9 large scale enterprise applications, the largest exceeding **\$150M** project budget and **3.8M** lines of code

- **3** commodities/trading platforms processing **100k+** daily trades representing over **\$1.2B** / year in business in **15** global markets.
- **2** logistics platforms (maintenance management, midstream oil/gas)
- **4** commercial products totaling over **\$200M** revenue / year

Individual contributor, too many initiatives to count

Architect, director and lead of **13+** teams with **3 - 20** direct reports (developer, QA, DevOps, BA, etc.)

16+ years C# and .NET development; additional experience in at least **5** declarative languages, **7** imperative, and **4** operating environments

Experience

Eleox (natural gas), Senior Software Engineer, Apr 2025 – Jul 2026

(Established startup: AWS, C#/.NET, REST)

Backend engineering and architecture in the natural gas space primarily for nominations and reference data. Aided in API development allowing SaaS clients to integrate their ETRMs through a hub/spoke-model integration platform, simplifying integration with trading partners.

bp (oil/gas/power), Technical Lead, Dec 2023-2024, May 2011 – Dec 2012; System Architect, Sep 2007 – Apr 2009

(Large enterprise: C#/.NET, Azure, messaging, and integration)

Retail Power Set development standards for the team across tools, products, and processes. Integral to delivering a solution for power pricing, primarily with .NET and Azure.

Deal Blotter Led development of an NGL blotter platform integrating with SolArc RightAngle. Generalized the technical framework and then specialized it for NGL. Worked with traders, analysts and architects to carry the platform to the wider enterprise. Developed tools for deal capture, legal entity reassignment, and confirmations.

Market Intelligence Platform Facilitated the delivery of a distributed, message driven and transactional application that collects, normalizes, and stores market-related information. A web API facilitated natural gas quantitative analytics, reducing costs and enhancing revenue.

Shell Energy Americas (energy, gas, trading & supply), Solution Architect, Nov 2022 – Dec 2023

(Large enterprise: Data Architecture, Azure, C#/.NET)

Natural gas solution portfolio included foreign taxation, deal pairing, settlements and nomination. Responsible for architecture in an Azure environment. Part of a technical working group with the Eleox JV to develop a hub/spoke model simplifying integrations with trading partners. Data-centric approach avoided overly relying on ETRMs.

TradeStation Crypto, Inc. (fintech), Technical Lead, Nov 2021 – Aug 2022

(Startup-like: AWS, C#/.NET, Kubernetes, ASP.NET, Entity Framework, REST)

Delivered orchestrated microservice-based backend solutions for the company's crypto trading platform. Areas of specialty included settlements, reconciliation, and order management.

Schlumberger (oil & gas), Technical Lead, Oct 2018 – Nov 2021; Solution Architect, Dec 2012 – Jun 2013

(Large enterprise: Azure, Docker, C#/.NET, ASP.NET, Entity Framework, MongoDB, Redis, REST)

Technical lead/architect Created a scalable REST API, containerized, "eventually consistent" equipment lifecycle solution. The microservices federates calls to backend systems and consolidates the frontend. Worked with the team, sprint over sprint, with a craftsmanship mindset to realize the product.

Solutions Architect Specified solutions for business intelligence, process management, and process architecture (BI/BPM/BPA). Promoted enterprise architecture for master data management and enterprise applications.

Bank of America Merrill Lynch (commodities), Technical Lead, Jul 2016 – Sep 2018; Oct 2009 – Apr 2011

(Large enterprise: C#/.NET, WPF, ASP.NET, TIBCO EMS/RV, Oracle, Endur)

Order Management Led and developed a scalable logistics, order management, and scheduling system that integrates with Endur. Isolated business logic using DDD principles and developed a full-stack solution supporting email, integration, alerts, and notifications into a pre-cloud active/active and active/passive distributed system.

Trade Capture Led 8-12 developers for a trade capture system for commodities. Designed and developed clustered, fault-tolerant, multithreaded services. Integrated multiple data sources and trading systems. Releases comprised overlapping work streams, facilitated market onboarding and rollout of features. Increased operational uptime and performance. Scaled to a geographically distributed team generating 100+k trades/day across multiple markets.

Enterprise Products (oil & gas), Technical Lead, Jun 2013 – Jun 2016

(Large enterprise: C#/.NET, JavaScript, ASP.NET, Entity Framework, git, Solace, SQL Server, Razor)

Managed over 20 developers and QA. Interacted with line owners and business architects on a large scale, complex, greenfield event-driven liquid logistics system. Used DDD, messaging, .NET, patterns, and processes. For the client's \$150 million investment, provided key architectural input for the MMB, and terminal functions. Instrumental in master data, scheduling, nominations, accounting, and contracts. Scaled data collection to 10x projected need.

Additional Experience

Brocade & NuView, Inc. (storage management), Technical Lead

(Startup/Medium ISV: C#/.NET, C++, Windows, WinForms, NetApp Filers, DFS, NFS)

Provided project and technical leadership, architecture, and development skills for enterprise storage management products (StorageX and FME) in SAN, WAN, NAS, and WAFS environments. StorageX revenues have surpassed \$200 million/year and provide aggregation and centralized management of data storage across heterogeneous environments. Developed server and smart client components using C#, SQL Server, managed and unmanaged C++.

Waste Management (transportation), Architect/Developer

(Large enterprise: C#/.NET, Java/J2EE, Web services)

Provided development, integration, and architecture services for several enterprise-class projects, using .NET, J2EE, SQL Server and Oracle. Developed SAN-based terabyte image storage and retrieval application; developed and integrated many Web services; developed .NET web application with SQL Server Reporting Services.

Trendec (education), Consultant

(Boutique consulting: C#/.NET, Java/J2EE)

Deployed a scalable C# .NET security Web service, several ASP.NET applications, and J2EE curriculum application for the client. Architecture encompassed logical and physical features for both data and applications. Led the integration of the new applications with existing data sources. Led the re-engineering of an existing ASP application to ASP.NET. Hired and led the technical team through the entire software development cycle.

Mongoose Technology, Inc. (ISV, enterprise portals), Director, VP Engineering

(ISV/Startup: Java/J2EE, XML, Active Directory, LDAP)

Released a comprehensive portal framework providing federated security through Active Directory and LDAP and identity services. Architected, designed, and coded significant portions of the portal IDE, portal web-tier, and business-tier.

Provided vision, leadership, and management for all product development initiatives. Managed a geographically distributed team of developers, technical writers, network engineers and QA. Worked extensively with both customers and partners.

PLATINUM technology, inc. & ProtoSoft Inc. (information technology), Senior Software Developer

(Startup/large enterprise: Visual C++, MFC, COM, Windows)

Responsible for the technical direction of UML modeling tools including the flagship product, Paradigm Plus using C++, MFC, ATL/COM, JavaScript, and Java. Included product architecture, interface specification, component implementation, information modeling, integration with other products, technical direction and mentoring of product developers, GUI definition, software lifecycle management, and technical presentation and documentation.

Education

Texas A&M University, College Station, Texas

College of Engineering

Major, Bachelor of Science, Computer Science; Minor, Finance
